

Nvidia Installer Failed Fix Steps

1. Download Display Driver Un-installer (DDU) tool

Link: <http://iceqman101.weebly.com/downloads.html>

2. Download graphics card compatible driver from
NVIDIA website and save it on your desktop

<http://www.nvidia.com/Download/index.aspx?lang=en-us>

3. Uninstall NVIDIA driver using the Display Driver
Un-installer (DDU) tool and delete the NVIDIA
folders (You will have to boot into safe mode but the
DDU program will do it for you)

4. Once rebooted you need to install the driver for your
graphics card that is saved on your desktop and
you're done!
